PROFESSIONAL EXPERIENCE

Charles Schwab, Sr. Full Stack Developer

Jan 2025 – Current

- Architected new applications integrated with event-driven and RESTful services
- Mentored junior developers on clean code and best practices
- Led requirements gathering for enhancements to existing applications
- Conducted peer code reviews and provided actionable feedback
- Optimized SQL queries using SSMS performance tools, improving user experience
- Migrated CI/CD pipelines from Bitbucket/Harness to GitHub
- Incorporated user feedback to boost satisfaction scores to Schwab's highest application
- Created reusable generic packages for company-wide adoption

Charles Schwab, Full Stack Developer

April 2023 – Jan 2025

- Developed responsive user interfaces in React 17
- Led transition to TypeScript for trader-facing applications
- Built and maintained REST APIs using .NET 6+
- Designed and managed relational databases
- Integrated data pipelines from Google Cloud Platform (GCP)
- Enforced linting standards and improved code quality
- Integrated automated testing (Mabl) into CI/CD workflows

Texas Health and Human Services Commission (HHSC), Full Stack Developer / Programmer IV

November 2020 – April 2023

- Developed interfaces in Vanilla JavaScript and React
- Built REST APIs using .NET 4.8 and .NET 6
- Provided technical expertise during requirements gathering phases

Alliance Transportation Group, Inc. (ATG), Web Developer / Sr. Business Analyst

September 2017 – October 2020

- Analyzed public sector datasets using Python and T-SQL to support decision-making
- Facilitated requirements gathering and stakeholder engagement
- Produced documentation, training materials, and user guides

PROFESSIONAL PROJECTS

Trading Architecture and Design

March 2025 – Current

- Designed architecture for a trade correction solution tailored for Schwab traders
- Integrated application with event-driven and REST systems
- Developed resilient and intuitive UIs for placing trades
- Managed regulatory and compliance stakeholder needs

Trade Dispute Modernization

October 2023 – December 2024

- Developed modern UI for trade dispute submission and review
- Integrated data flow into Salesforce (SF)
- Engineered GCP pipelines for trade error reporting
- Created RESTful APIs for dispute data access and updates
